

High Risk Scenario

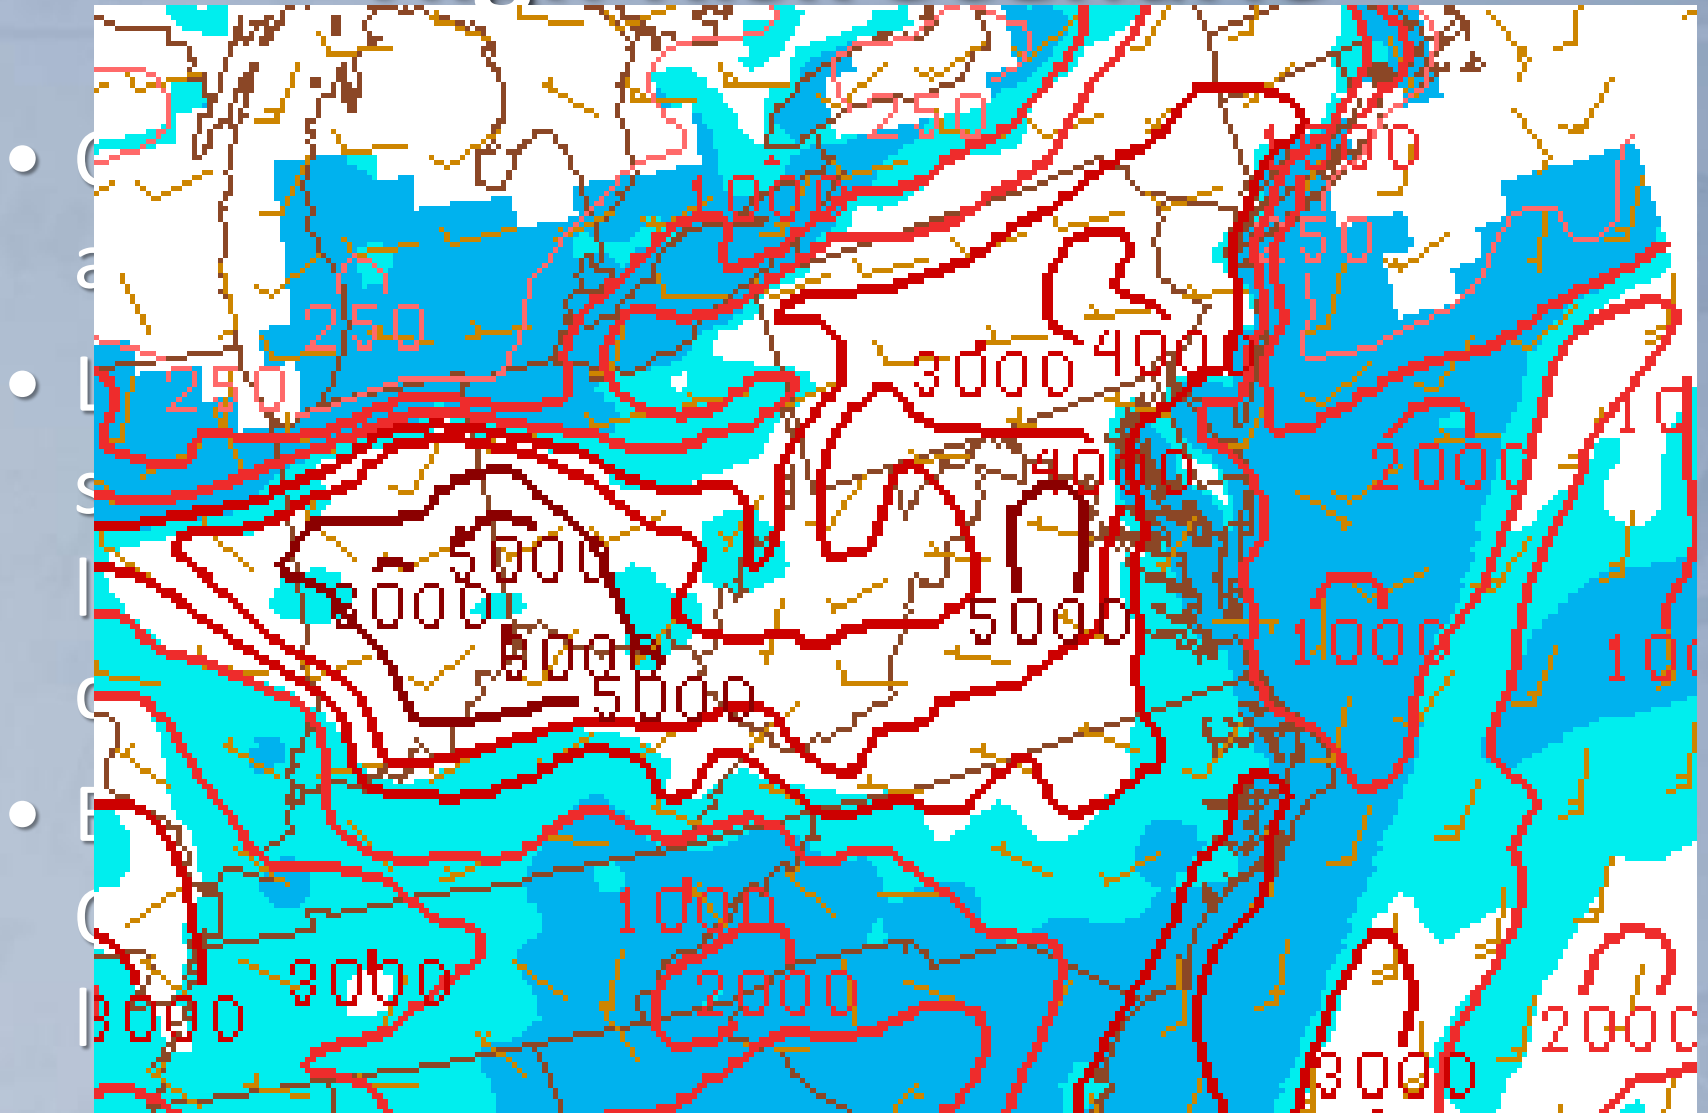

- Early Morning (5-6am), Friday, July 3rd, 2015

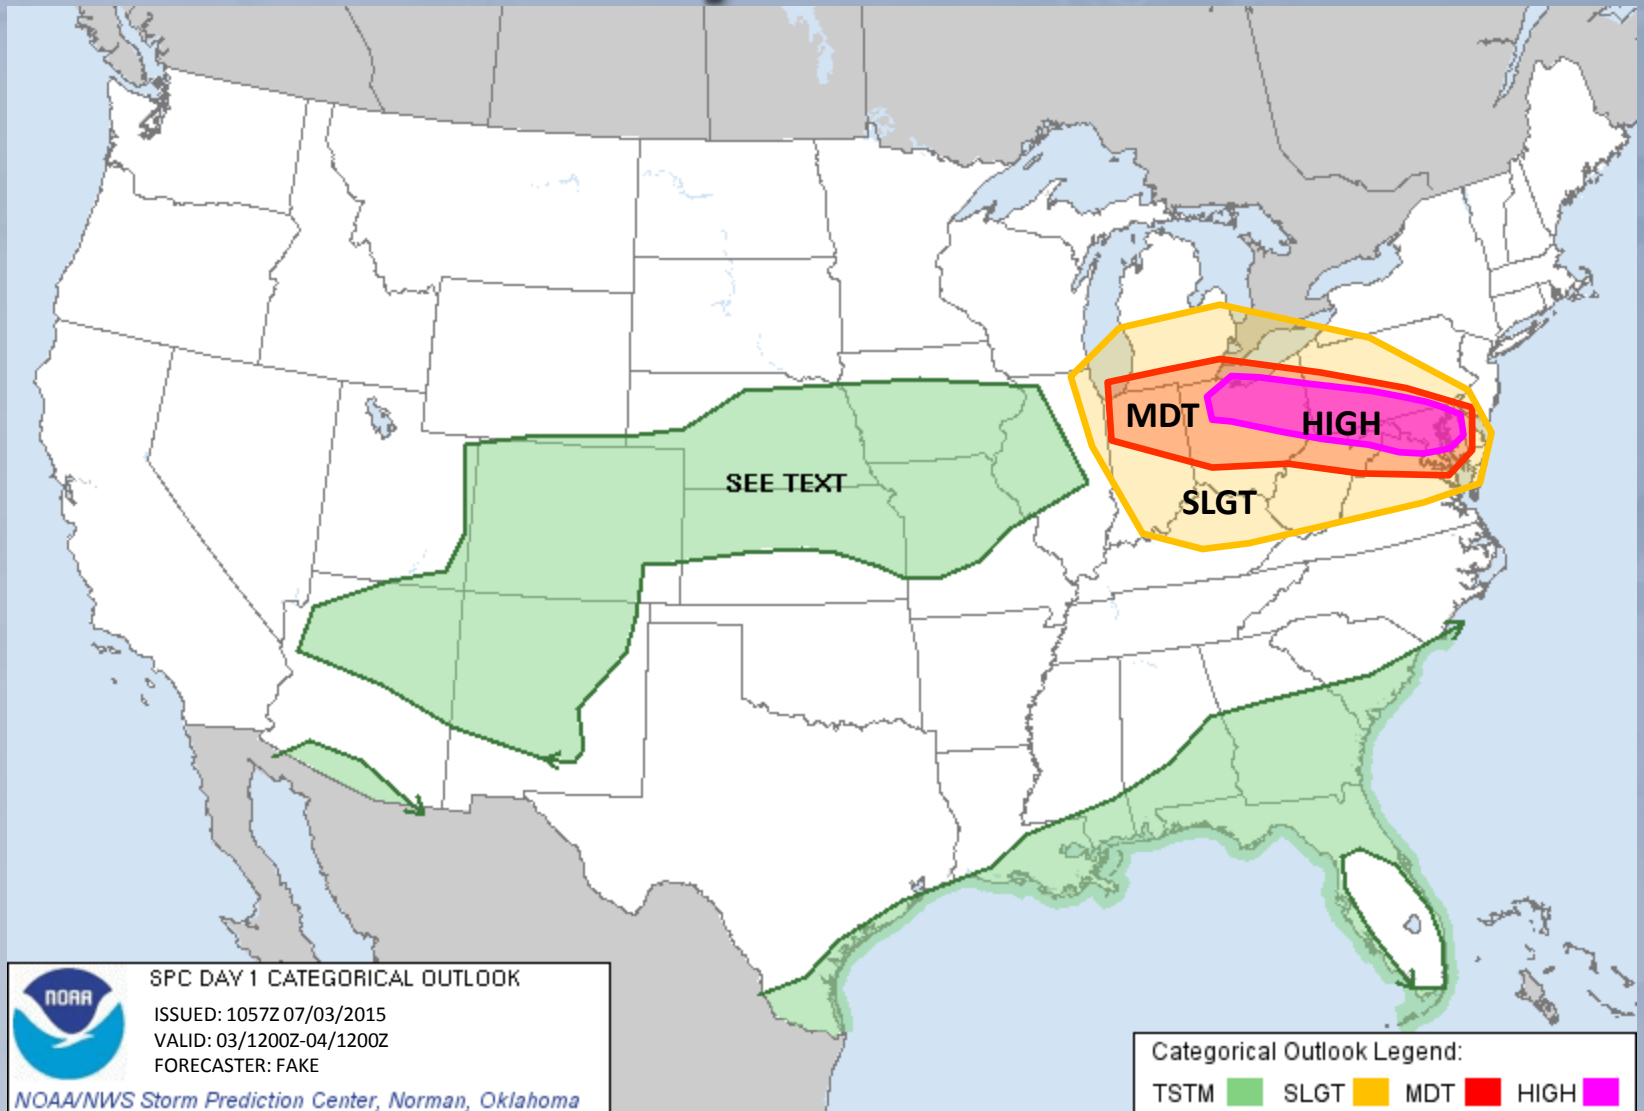

- It has been a **hot and humid** week
 - ✓ Temperatures in the upper 90s
 - ✓ Dewpoints in the low 70s
 - ✓ heat indices 105-110

High Risk Scenario

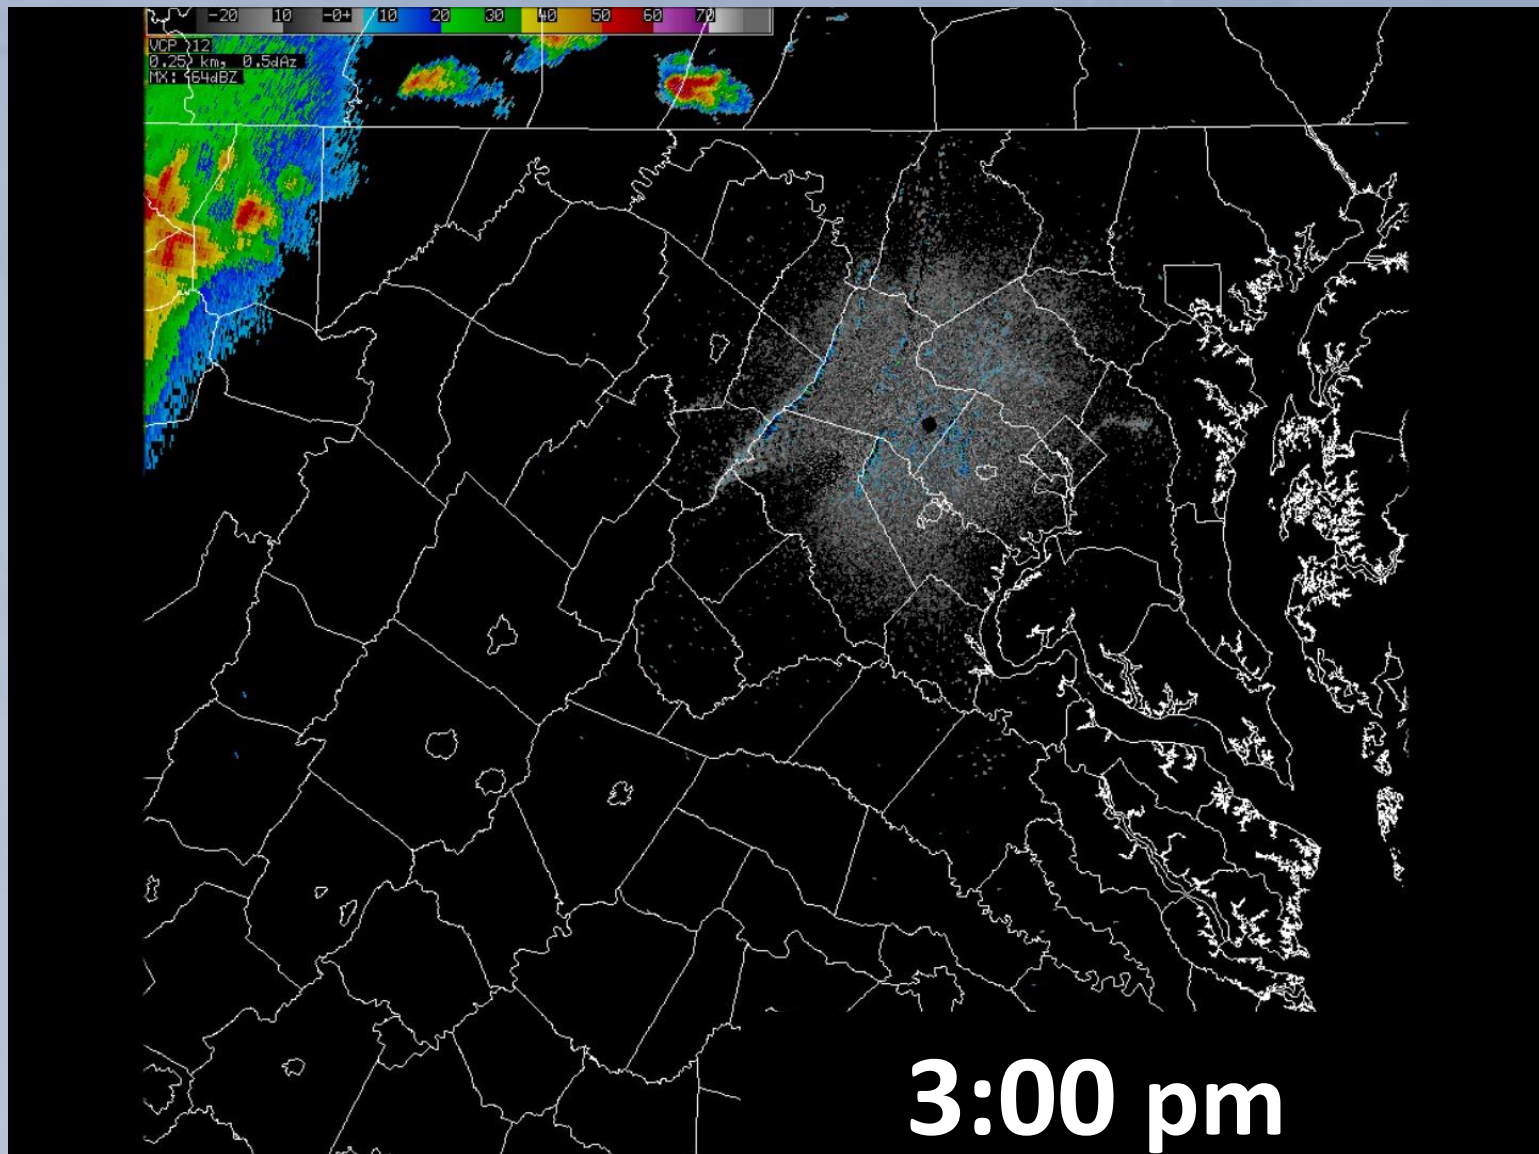

SPC Day 1 Outlook

Widespread Damage?

- If it comes to fruition, widespread damaging winds, perhaps a derecho event, with leading edge tornadic spin-ups – all look like a real possibility
- Most likely timing will be 4-7pm across the DC and Baltimore metro areas.

Radar Confirmation

Several reports of 60-70 and even one 80 mph winds

Sightings of a tornado – unconfirmed but damage to homes and trees has occurred

Atmosphere remains prime for continued long-lived damaging wind event with leading edge brief tornadoes
